

PROGRAM D: C-SCAN DISK SCHEDULING

C PROGRAM

```
#include <stdio.h>
```

```
int main() {
```

```
    int head = 53;
```

```
    printf("C-SCAN Disk Scheduling\n");
```

```
    printf("Initial Head Position : %d\n", head);
```

```
    printf("Head moves in one direction.\n");
```

```
    printf("After reaching the end, it returns to the beginning.\n");
```

```
    return 0;
```

```
}
```

SHELL SCRIPT

```
GNU nano 8.7.1
#!/bin/bash

echo "C-SCAN Disk Scheduling"

echo "Head moves in one direction only."

echo "After reaching the end, it returns to the beginning."
```

Output :

```
(ganesha@LAPTOP-R3RDH9NG)~$ nano cscan.sh
(ganesha@LAPTOP-R3RDH9NG)~$ chmod +x cscan.sh
(ganesha@LAPTOP-R3RDH9NG)~$ bash cscan.sh
C-SCAN Disk Scheduling
Head moves in one direction only.
After reaching the end, it returns to the beginning.
```
